**Equal contribution

Email addresses: `alice@example.com` (Alice Anonymous), `bob@example.com` (Bob Security), `cat@example.com` (Cat Memes), `derek@example.com` (Derek Zoolander)

9 The Elsevier article class 45

10 *Installation.* If the document class *el-*
11 *sarticle* is not available on your com- 46
12 puter, you can download and install
13 the system package *texlive-publishers*
14 (Linux) or install the LaTeX package
15 *elsarticle* using the package manager of
16 your TeX installation, which is typically 51
17 TeX Live or MikTeX.

18 *Usage.* Once the package is properly 52
19 installed, you can use the document 53
20 class *elsarticle* to create a manuscript. 54
21 Please make sure that your manuscript 55
22 follows the guidelines in the Guide for 56
23 Authors of the relevant journal. It is not 57
24 necessary to typeset your manuscript 58
25 in exactly the same way as an article. 59
26 unless you are submitting to a camera- 60
27 ready copy (CRC) journal. 61

28 *Functionality.* The Elsevier article class 55
29 is based on the standard article class
30 and supports almost all of the function- 56
31 ality of that class. In addition, it fea- 57
32 tures commands and options to format 58
33 the 66

- 34 • document style 67
- 35 • baselineskip 68
- 36 • front matter 69
- 37 • keywords and MSC codes 70
- 38 • theorems, definitions and proofs 71
- 39 • lables of enumerations 72
- 40 • citation style and labeling.

41 Front matter

42 The author names and affiliations
43 could be formatted in two ways:

- 44 (1) Group the authors per affiliation.

- (2) Use footnotes to indicate the af-
filiations.

See the front matter of this doc-
ument for examples. You are recom-
mended to conform your choice to the
journal you are submitting to.

Bibliography styles

There are various bibliography styles
available. You can select the style of
your choice in the preamble of this doc-
ument. These styles are Elsevier styles
based on standard styles like Harvard
and Vancouver. Please use BibTeX to
generate your bibliography and include
DOIs whenever available.

Here are two sample references: Feyn-
man and Vernon Jr. (1963; Dirac, 1953).
